

Attitude Adjustment Sailing, LLC Yacht Delivery/Relocation

Domestic or International

Attitude Adjustment Sailing, LLC. offers both Domestic and International Yacht Delivery and Relocation services for both sail and motor vessels. We have extensive experience in the North Pacific, South Pacific, Atlantic, Gulf of Mexico, and the Great Lakes. In addition, we have made over 11 Pacific crossings the longest of which was 6,030nm.

We offer dock-to-dock Delivery/Relocation of your vessel. In addition, we offer Pre and Post Positioning of your vessel if loading and/or unloading from a delivery ship. We can offer you choices that meet your needs.

Sail and Motor Vessels

We move everything from a 40 ft sloop to a 500GT motor vessel.

We have years of experience on a variety of different Motor and Sailing vessels running an array of different electronics and all with different handling characteristics. This experience has served us well in so much as we now know the major systems onboard most yachts and have a good feel for the differences between various boats in terms of operations and handling.

With over 350,000nm and decades of experience on various boats there is little that takes us by surprise. However, these are boats we are talking about, so you're always going to get pitched a curve ball from time-to-time. This is where experience counts.

Delivery/Relocation

Yacht Delivery and Relocation are nearly synonymous.

A yacht Delivery generally involves a more permanent relocation of a vessel versus a Relocation which generally involves such things as Summer or Winter Relocation on a non-permanent basis. Regardless of what term you use, they both entail moving a vessel from point A to point B.

Here are some of the Options available:

- Dock-to Dock Delivery Service
- Dock-to-Ship Delivery Service
- Ship-to-Dock Delivery Service

Clearly, there can be one or more landfalls for fuel or provisioning on these projects. One thing is always clear; our outstanding Service and Support.

Relocation by Ship

If it makes economic sense to ship your vessel on the back of a cargo ship we can be of great help. We can coordinate all aspects of the Relocation and make the whole process seamless and transparent. We can also handle just one leg of a ship borne transit of your vessel or manage any aspect of the process where we add value.

We work with all the major Yacht Transport companies and can pass on savings to you if you decide to choose this method of vessel relocation.

We pride ourselves on our Professionalism, Outstanding Service, and focus on you the Client.

The Process

Three Steps to Relocating your Yacht

- **Step One-Planning**

Meteorology, Navigation, Oceanographic considerations, Vessel Specifications, Crew Requirements, Gear Requirements, Fuel, Water, LPG, Spares, Provisioning, go/no-go considerations, Transportation, Lodging, other critical path considerations.

- **Step 2-Execution**

Maintain an active watch 24 hrs a day while maintaining an hourly log. Engine Room inspected routinely when under power.

- **Step 3-Delivery Complete**

Deliver yacht to Owner or Agent. Interior and Exterior of Yacht fully cleaned. Interior disinfected to prevent spread of disease.
